## Artist Profile

I am a creative artist, I often start with my work with a subject or an idea, which I then take on and develop further. When I work I have to truly inspired to see and believe in the image otherwise it will not work. My work covers a variety of genres and styles. However it tries to look at the issues within the piece, in a new way and give a greater understanding of the subject, but also to the aesthetic's of light, shape and form. I work with a range of cameras in both film and digital.

I would say I am influenced by Brassai, Martin Parr, Bill Brandt, Gillian Wearing and Sam Taylor Wood.
